DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 10-16, 18, and 23-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Cooper (4,313,135).

Regarding claim 1, Cooper shows a step of executing a second synchronization signal generating operation (14,18), a step of detecting time difference jitter (17), and a step of controlling (19).

Regarding claim 2, Cooper shows a step of generating (14), and a matching delay (18) which meets both the step of delay and the step of matching (see also col. 4, lines 17-65).

Regarding claim 3, see col. 3, lines 3-15.

Regarding claim 4, see col. 3, lines 18-20.

Regarding claim 10, see Figure 1.

Regarding claim 11, see field detector 15.

Regarding claims 12-16, 23, see the corresponding rejections as set forth above.

Regarding claim 18 (the current claim is being treated as depended on claim 13), see col. 3, lines 17-18.

Regarding claims 24 and 25, see col. 2, lines 59-67.

Regarding claim 26, see col. 2, lines 45-59.

Regarding claims 27-29, in addition of above, the processing device 2 in Cooper is intended to be any conventional video processing device, such as a waveform monitor (see col. 2, lines 11-15).

Allowable Subject Matter

3. Claims 5-9, 17, and 19-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kimura et al. (6,275,265) shows an internal video signal and an external video signal.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Lee whose telephone number 571-272-7349. The examiner can normally be reached on Monday through Thursday from 9 to 6.
